

Registration Open to Kenfil Customer Only

Exclusive Invitation to Customer Technical Community (CTC)

Microsoft Auditorium, KLCC

24th November 2010 (Wednesday), 9:00am to 1:00pm

A brainchild as a result of the continuous support received from its customers, Kenfil Malaysia is proud to introduce its inaugural Customer Technical Community event that is planned, designed & delivered specifically for the technical community. Objective of this initiative is to create an avenue to enable all IT professionals from different sectors & industries to congregate in a venue to learn and exchange technical practices.

Like most customers would normally quote this to their vendors - "While your job is completed, our nightmare has just begun". In Kenfil, we understand that the biggest challenge that most IT professionals would face whenever deploying a new infrastructure is to sustain the change and to meet the expectation from the management committee. Solely based on this belief, Kenfil sees the needs to ensure that all its customers are kept relevant and receive continuous post implementation support. It is Kenfil's utmost wish to see that all technologies deployed at every customer's site are managed, sustained and most importantly generating the return on investment opportunities.

If you would like to learn more about managing & sustaining your IT infrastructure or if you are in the midst of planning your FY11 IT capex, join us in Customer Technical Community .
